

Our Only World (Land) Copyright 2018 and 2023 David Smart / Joe Broadfoot

Intro

I've run out of stories to tell
About the world I love so well
From the mountains, to the rivers and the sea
Where fish cry tears in toxicity.

Verse 1

If pollution must continue then dark will take the day
And the turquoise lakes and rivers will be turning shades of grey
With all this trash/plastic left around
The ground is poisoned as well
We've gotta make a difference
This is our only world (our only world)

Chorus

Singing Hey, Hey!
Let's help our world to make it
Save the day, Hey!
It's ours come on don't break it
We can do more
Let's get everybody down to where the waters flow
Come on let's mean it
Singing hey Hey!
Let's help our world to make it
Save the day, hey!

It's our's come on don't break it

We can do more

Let's get everybody down to where the waters flow

Verse 2

If the winds of change are coming

It has to be a blast

Or the creatures in this world

Will be living in the past

The future's not beyond them

This is our story to tell

We've gotta make a difference

This is our only world (our only world)

Chorus

Singing Hey, Hey!

Let's help our world to make it

Save the day, hey!

It's ours come on don't break it

We can do more

Let's get everybody down to where the waters flow

Come on let's mean it

Singing hey Hey!

Let's help our world to make it

Save the day, hey!

It's our's come on don't break it

We can do more

Let's get everybody down to where the waters flow

Bridge

Who designed this deadly waterslide?

Let's turn this roller coaster around this is our time

Chorus (All In Acapella + Harmonies and Backing Vocals)

Singing Hey, Hey!

Let's help our world to make it

Save the day, hey!

It's ours come on don't break it

We can do more

Let's get everybody down to where the waters flow

Come on let's mean it

Singing hey Hey!

Let's help our world to make it

Save the day, hey!

It's our's come on don't break it

We can do more

Let's get everybody down to where the waters flow

Outro

We've run out of stories to tell,

About the world we love so well

From the mountains to the rivers and the sea

Where fish cry tears in toxicity
